Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 February 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 15-21 is/are pending in the application.

DETAILED ACTION

Claim Objections

Claim 15 is objected to because of the following informalities: Part D lines 3-4 state "said flow line" which should state "said flexible tube flow line". Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 15-21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 15 part E states the segments to be electrically and mechanically joined together, the specification and the drawings together have not enabled one of ordinary skill in the art as to where and how the segments are connected. Also, it is the examiner's position that the applicant has not clearly disclosed how the series connection is made if it were to extend across the middle wall through a hole OR if the series connection was made at the distal end of the tube in which the problem of the

outlet piece 14 enters the picture and how the connection is made with respect to the outlet section.

Specification

The amendment filed 10/06/06 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: The specification adds new matter with respect to page 5 lines 8-10 which starts with "24 Electrical and mechanical joining ...", the joining section was not fully described or noted before and the location of the joining or how the joining was made was not previously disclosed. The examiner would also like to note that even though there is no objection to the amendments made to page 9 which states "this joining together is shown schematically ...", the joining itself is objected to below in the drawings since there was no description to where or how this joining was made in the original filing.

New matter was also introduced into the drawings with respect to figure 1B, the addition of the connector wire 24 to the heater segments are seen to be new matter along with the location of the connection, the means for creating the series resistance circuit was not disclosed to necessarily utilize a single wire or the orientation of the wire or the connection of that wire to the heater segments through soldering or spot welding.

Applicant is required to cancel the new matter in the reply to this Office Action.

Response to Arguments

The examiner would like to note that the claim objections with respect to claim 15 parts E & G have been withdrawn due to the amendments to the claim but an objection to part D has been made above. The objection to drawing 1A has been withdrawn. The amendments to the brief description of the drawings with respect to figure 1, 1A, & 1 B are accepted.

Allowable Subject Matter

Claims 15-21 are objected to and would be allowable if the objections to the specification, claims, and drawings are overcome.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Benjamin Huh whose telephone number is 571-272-8208. The examiner can normally be reached on M-F: 9:00 AM - 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Sirmons can be reached on 571-272-4965. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
